

ARINCDirectSM Flight Operations System (FOS[®])

STREAMLINED FLIGHT OPERATIONS

Save time, reduce costs and serve
your customers more effectively

Collins Aerospace

EASY, EFFECTIVE, COMPLETE

Handling the flight operations of business aircraft involves a staggering number of interconnected details. Schedulers, dispatchers and other members of flight departments have traditionally relied on a fragmented assortment of sources and services to help them gather, assemble, coordinate and analyze this crucial information

The old process is full of frustrations and inefficiencies, and can leave you looking for a better way. The better way is here. Collins Aerospace ARINCDirectSM Flight Operations System (FOS[®]).

ARINCDirect FOS streamlines your flight operations, no matter how demanding or complex. The system brings you unparalleled speed, functionality and ease of use. It gathers all the information you require in one place, with a rich array of features and no redundant data entry.

NEW INTEGRATION WITH ARINC DIRECT FLIGHT SUPPORT SERVICES

ARINCDirect FOS becomes the hub of your operations with the integration of our flight planning and data link. Run preliminary flight plans using aircraft performance data for more accurate enroute times and fuel burns. View current weather conditions on your selected routes. Request domestic slots. Send and receive data link messages. Track the status of your aircraft with the click of the mouse. ARINCDirect FOS saves you time and effort while reducing costs and helping you serve your customers more effectively.

STANDARD ARINC DIRECT FOS FEATURES INCLUDE:

- **Schedule board** – tailored displays of schedule information with live ASDI data, airport weather, crew currency, aircraft maintenance times and MELs, featuring a timeline for aircraft and crew availability and an at-a-glance schedule summary.
- **Crew scheduling** – sort list and select crew members based on specific qualifications for aircraft type, flight and duty times, or holidays worked over a specific period. Checks legality for the specified FAR (including Part 91, 135, 125 and 121) either automatically or by your request.
- **Scheduler's toolkit** – time and distance calculator computes local arrival or departure time, fuel burn, time enroute, time zone change and cost. Includes searchable worldwide airports, including 175,000 in the United States.
- **Charter quotes** – all-inclusive trip quote includes aircraft costs, landing, handling, parking fees, catering and crew expenses for specified itinerary for all your aircraft types. Automatically imports quote requests, sorts by cost and shows margin for each.
- **Training** – training requirement, crew currency and proficiency tracking with user-defined training syllabus and training history. Meets FAA guidelines for electronic record keeping.
- **Flight logs** – flight log, expense, aircraft and crew record tracking including crew flight and duty times. Provides operational summaries and comprehensive chargeback calculations. Meets requirements for electronic record keeping.
- **Third-party interfaces** – seamless integration with a host of third-party providers, making it easy to track the status of maintenance due items, monitor crew certification and training, view charter requests, link with ground service providers and more.
- **Report writer** – all reporting functions are provided by integration with Crystal Reports. Easily create your own formats for quotes, invoices, trip sheets, flight log forms and confirmations. Perform ad hoc queries and create custom reports for specific needs.

ARINCDIRECT FOS MOBILE LETS YOU ACCESS FOS DATA ANYWHERE

Access the ARINCDirect FOS tools and services you need from your iPad®, iPhone®, or Android™. Because the database resides on your device, you can access it inflight even when phone service is unavailable.

TAILORED SOLUTIONS FOR EVERY TYPE OF OPERATION

Our subscription pricing makes it even easier to realize the benefits of this powerful tool. Choose from three subscription package options – Essential, Professional or Enterprise – each scaled to the needs of your operations.

In these fast-moving times, having access to the most current information, no matter where you are, is more important than ever. By selecting the ARINCDirect FOS hosting option, you never have to worry. You have access from anywhere in the world to the most up-to-date information and your critical trip information.

ARINCDirect FOS is integrated with flight planning. We provide transparency and seamless integration between operations, cabin and aircraft, increasing predictability of operation, enhancing efficiency and reducing costs.

INNOVATION THAT KEEPS YOU AHEAD

Like your flight operations, ARINCDirect FOS is dynamic – responding to customer needs in an ever-changing industry. With Collins Aerospace, our forward thinking means you'll continually have the latest and most effective tools, services and support to keep your operations at their best.

GET THE MOST FROM YOUR ARINCDIRECT FOS SOFTWARE

Learn about the newest enhancements to the powerful ARINCDirect FOS software by attending a free monthly webinar. These webinars are intended for customers and are aimed to help flight departments get the most out of this thorough tool. Webinar topics include features of the training module, flight safety set up and basic scheduling features, with topics changing from month to month.

Interested in more in-depth training? We offer three-day FOS classes at our Houston, Texas facility. Sessions are designed for beginner and intermediate users, as well as those wishing to enhance their Crystal reporting skills. In addition to large group training, Collins also offers training for individual flight departments. This training can be completed onsite or via WebEx, depending on customer preference. Contact us for more information.
